Medical Coding in the Real World, Second Edition

AHIMA Product # AC234019

Page 404

True/False question #7 should read as follows:

> **7.** *Coding for wound repair requires adding up the lengths of the same sites and the same complexity.*

A corrected version of this question can be found in the instructor manual.

Page 785

True/False question #9 should read as follows:

> **9.** *Coronary artery bypass grafts that use arteries are coded from 33533 to 33548.*

A corrected version of this question can be found in the instructor manual.

Page 786

Coding question #4 is no longer valid. A replacement question appears below. Solutions are available in the instructor manual.

> **4.** *Direct repair of ruptured aneurysm of the abdominal aorta.*
>   *CPT codes:*
>   *ICD-10 code:*

Page 820

Chapter 20 case study question #5 contains superfluous instruction. It is not necessary to link diagnosis and procedure codes or add units for this exercise.
